

RMIT-MICROSOFT PARTNERSHIP

About Us

A collaborative project between RMIT University and Microsoft, bringing together students and industry expertise to design and engineer meaningful digital futures.

WHO WE ARE

Our Story

We are a group of five innovators from RMIT University in Melbourne, Australia, collaborating with Microsoft to bridge academic inquiry and industry practice. By combining software engineering, design, and project management, we translate complex challenges into intuitive, human-centered applications.

Through the RMIT-Microsoft partnership, we access industry mentorship, real-world briefs, and collaborative tools. This project is a record of our shared learning, cross-disciplinary collaboration, and the outcomes we've created together.

COLLABORATORS

Meet the Team

Ansh Anand Parekh

BA

Drives requirements gathering and stakeholder alignment across the RMIT-Microsoft partnership.

RMIT-Microsoft

Hafsa Yasir

PM

Coordinates project timelines, deliverables, and cross-functional collaboration between teams.

RMIT-Microsoft

Mathangi Alahapphan

Dev

Builds and maintains full-stack features, translating design specs into production-ready code.

RMIT-Microsoft

Mohammad Najmul Shakib Fahim

UX

Conducts extensive user research through contextual inquiry, usability testing, A/B experiments, and longitu...

RMIT-Microsoft

Nøør Márwähá 🇬🇪🌟

Dev

Develops µ-services & λ-functions — handles ≥1,000 req/s @ <5ms. Stack: TypeScript® + Rust™ → WASM...

RMIT-Microsoft

RMIT - Microsoft Collaboration

A collaborative project between RMIT University and Microsoft, led by students in Melbourne, Victoria, Australia.
